# Type 1 Diabetes Insulin injection action plan

## HYPOGLYCAEMIA

<table>
<thead>
<tr>
<th>Low Blood Glucose Level (BGL) &lt; 4</th>
<th>HYPERGLYCAEMIA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rapid onset - minutes</td>
<td>High Blood Glucose Level (BGL) ≥ 15</td>
</tr>
<tr>
<td></td>
<td>Slower onset - hours</td>
</tr>
</tbody>
</table>

### SIGNS & SYMPTOMS

- Tired, Hungry, Pale skin
- Shaking, Sweating
- Irritable, Mood change
- Dizzy, Headache, Confusion
- Drowsy
- Non-responsive
- Unconscious ± Seizure

### CAUSES

- Too much insulin
- Not enough carbohydrate from food
- Increased activity

### ACTION

**If CONSCIOUS & COOPERATIVE:**
1. If possible check BGL
2. Rest under supervision
3. If a meal or snack is due within 30mins Give 4 glucose tablets or 100mL lemonade followed by the meal/snack
4. If a meal or snack is not due within 30 mins give 4 glucose tablets or 100mLs lemonade followed by a carbohydrate containing snack (i.e. 3-4 Sao crackers, muesli bar=15 grams).
5. Recheck BGL after 20-30 mins.
6. If BGL remains < 4 or symptoms persist, repeat the above treatment again.

**If UNCONSCIOUS/UNCOOPERATIVE:**

### CAUSES

- Not enough insulin
- Food containing too much carbohydrate
- Infection / Illness / Stress
- Decreased activity

### ACTION

1. Check child has washed hands and has not eaten within the last 2 hours.
2. Check for Ketones in the blood or urine.
3. If KETONES ARE NEGATIVE:
   1. Encourage water to drink.
   2. Do not restrict meals, snacks or exercise.
   3. Re-check BGL and ketones in 2 hours (at the next meal or snack).
4. If KETONES ARE POSITIVE or CHILD UNWELL:
   1. Contact parent, we recommend them to collect the child.
   2. If the ketones increase then the child must go home.
   3. Do not leave the child, adult supervision is required at all times.
1. Turn child onto their side (Recovery Position)
2. DRS ABCD (Danger, Response, Send for Help, Airway, Breathing, CPR, Defibrillation)
3. Stay with child and call for help to contact an Ambulance (call 000)
4. Ring parents or if unable to contact parents, contact PMH Diabetes Clinic for assistance

**NB. EXERCISE**
The child may need to eat extra carbohydrate containing snacks e.g. fruit, sandwich or crackers before, during and after exercise and check their BGL.
